

HIV-1 VIRAL RESISTANCE: Virco®TYPE HIV-1

Virco® TYPE HIV-1 is a clinically validated HIV-1 resistance analysis, which provides a combination of genotypic and phenotypic information. The test results are interpreted in a clinical context to ensure maximal utility for making therapeutic decisions in daily practice.

Genotypic Information

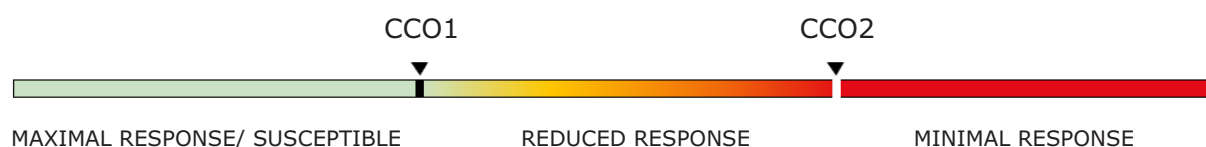

- Resistance-associated mutations in the protease and reverse transcriptase genes of the sample virus, grouped by drug class (NRTI/NtRI, NNRTI and PI)
- A complete list of all differences from the reference wild type HXB2 virus

Resistance Status

Virco®TYPE HIV-1 is the first HIV-1 drug resistance test using internationally agreed Clinical Cut-Offs (CCOs). Based on the viral genotype, the test predicts:

- Drug resistance
- Cross-resistance
